Description:

CIBR tracks a liquidity-weighted index that targets companies engaged in the cybersecurity industry.

Fund Insight:

CIBR is a specialized fund focusing on cybersecurity companies as classified by the Consumer Technology Association (CTA), which means it holds primarily software and networking companies, but also branches out from the tech sector into more diversified industries like aerospace & defense. This slightly expanded focus is the major distinction between CIBR and other similar funds, most of which have small, tech-dominated portfolios. It weights holdings by liquidity, which makes sense given the funds small-cap exposure. It also caps the weighting of the securities of the five most liquid companies at 6% each, while the securities of the remaining companies are capped at 3%. The index is rebalanced quarterly.

Southwest Airlines Co.	10.42	Air Canada	3.59
Delta Air Lines, Inc.	10.41	Alaska Air Group, Inc.	3.41
Allegiant Travel Company	4.30	SkyWest, Inc	3.37

Description:

JETS invests in both US and non-US airline companies. This concentrated portfolio is weighted towards domestic passenger airlines.

Fund Insight:

JETS invests in all-cap companies of both US and international passenger airline industry including aircraft manufacturers and airport companies. The index utilizes a tier's1 weighting scheme driven mostly by market cap as well as passenger load. As a result, the portfolio puts about 70% of its weight in US large-cap passenger airlines (at quarterly rebalance), with the top four companies receiving 10% each. The next five largest US or Canadian airlines each receive a 4% weighting. The remaining airline companies, that meet minimum trading and liquidity requirements, are scored based on fundamental factors. Scores are driven by cash flow return on capital, gross margin, sales growth and sales yield. The top five US or Canadian companies based on this composite score receive 3% weight and each of the 25 non-US companies scoring highest receive 1% weight. In September 2020, the strategy and weighting of the underlying index was modified without significant changes to exposure.

Description:

IBB tracks the performance of a modified market-cap-weighted index of US biotechnology companies listed on US exchanges.

Fund Insight:

IBB tracks an index of US biotechnology companies listed on the major US exchanges. This includes companies engaged in the research and development of therapeutic treatments but are not focused on the commercialization and mass production of pharmaceutical drugs. This also includes companies that are engaged in the production of tools or systems that enable biotechnology processes. IBB includes companies of all capitalizations, and weights using a modified market-cap methodology. Individual holdings are subject to capping requirements, 8% on the five largest constituents and 4% for the remaining. The index is rebalanced quarterly and fully reconstituted annually in December. Prior to June 21, 2021, the fund was named iShares Nasdaq Biotechnology ETF and tracked the NASDAQ Biotechnology Index.

Description:

ARKG is an actively managed fund that targets companies involved in the genomics industry.

Fund Insight:

ARKG reaches across multiple sectors and geographies for companies that the advisor believes will benefit from innovations in the genomics-related industry. Such companies are those that may develop, produce or enable targeted therapeutics, bioinformatics, stem cells or molecular diagnostics. The reality is almost all of its holdings are in US healthcare-related companies, with biotech naturally leading the way. This is a niche fund which employs an actively-managed strategy. Hence investors should look closely at where the fund makes its investments. The weights of the top five

Description:

SPHB tracks a beta-weighted index of the 100 highest-beta stocks in the S&P 500.

Fund Insight:

SPHB is the S&P 500 ETF for extreme market bulls almost akin to a leveraged fund. In selecting constituents for the underlying index, trailing daily price changes over the past 12 months is used to calculate the S&P 500 constituents betas. Such constituents are then ranked in descending order of their betas wherein the top 100 securities finally form the index. Its weighting methodology is also designed so each constituent is set proportional to its beta all these in an attempt to magnify market movements. While SPHB doesn't look much like the broad US large-cap space, it fulfills its high-beta mandate.

Objectives of the Sector Allocation Model

We aim to create a systematic approach to sector allocation that our members can easily grasp and use to outperform the market in the long run.

Systematic Approach – Although our Sector Allocation model reflects our expectations for the future stock market, we have designed this model as a systematic approach. This will reduce the influence of personal intuition or judgment on the results. Importantly, this offers consistency, making it easier for our members to distinguish the differences between this month's allocations and those of previous months. Specifically, they can clearly discern what changes have led to our adjustments in sector weighting.

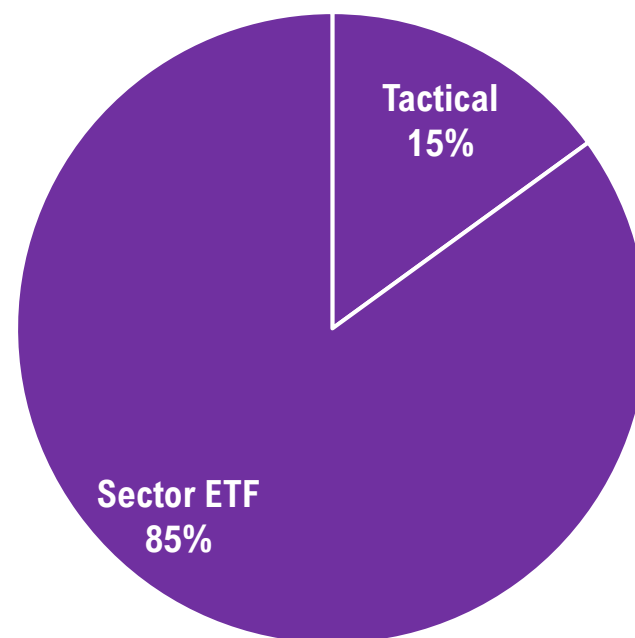

Understandability - We strive for simplicity and transparency. By establishing clear steps and guidelines, anyone involved can easily comprehend how weights are determined and why certain decisions are made. We have refrained from introducing new jargon or overly complex systems. Our objective is to make all aspects understandable, from the qualitative logic behind sector-weighting decisions to the quantitative process of producing the final sector weights.

Versatility – We aim to cover both short-term and long-term strategies, as well as both active and passive approaches, with our new model. While our macro team predominantly focuses on long-term strategies, we do not want to neglect short-term dynamics. Our new sector allocation model, akin to our acclaimed Granny Shot stock list, merges both our long-term sector perspectives with short-term market technical dynamics. In its design, we also took into account the preferences of some members who require their sector allocations to vary only within certain limitations from the standard sector weightings. The final model therefore encompasses passive index tracking and our subjective sector strategies. In the future, we hope to make the ratio between active and passive approaches adjustable, allowing members to input their desired ratios to produce personalized sector weighting recommendations.

Summary

	Universe	Description
Sector ETF Allocations (85%)	11 Sector SPDR ETFs	<i>The strategic sector ETF allocation is based on the summation of 3 sub-components: 1\ based on the current sector distribution of S&P 500 index; 2\ based on the sector rating of Fundstrat Head of Research Tom Lee and the sector technical rating of Fundstrat Head of Technical Strategy Mark Newton; and 3\ short-term sector momentum.</i>
Tactical ETF Selections (15%)	65 ETFs: 10 Style 20 Industry 35 Thematic	<i>Five ETFs, equally weighted, that we recommend for tactical holding. Their selection process is similar to our Super/Sleeping Granny Shot methodology that involves short-term technical scoring, Trend ranks, and Mark Newton's technical takes. We also utilize Morningstar's ETF ratings as part of consideration.</i>

In selecting these ETFs as part of the universe, we mainly consider: i) total Asset Under Management, ii) relative liquidity (gauged by 3-month average daily trading volume), and iii) expense ratios (favoring those from the same issuer for comparison's sake).

* if an UW sector weight is less than 2%, we will bring down the sector weight to 0% (instead of making it negative). The weight addition to each OW sector will be based on the total reduction of UW sector weight divided by 3.

Disclosures

This research is for the clients of Fundstrat Direct only. For important disclosures and rating histories regarding sectors or companies that are the subject of this report, please contact your sales representative or Fundstrat Direct at 150 East 52nd Street, New York, NY, 10022 USA.

Analyst Certification (Reg AC)

Thomas J. Lee and Mark Newton hereby certify that all of the views expressed in this report accurately reflect their personal views, which have not been influenced by considerations of the firm's business or client relationships.

Neither of these analysts, nor a member of their households is an officer, director, or advisory board member of the issuer(s) or has another significant affiliation with the issuer(s) that is/are the subject of this research report. There is a possibility that they will from time to time have long or short positions in, and buy or sell, the securities or derivatives, if any, referred to in this research

Conflicts of Interest

This research contains the views, opinions and recommendations of Fundstrat Direct. As of the time of writing and publication of this presentation, Fundstrat Direct does not know of, or have reason to know of any material conflicts of interest at the time of the publication of this presentation. The Company has no contractual relationship, nor have we received any compensation from any of the companies listed in this research report.

Analyst Industry/Sector Views

Overweight (+): The analyst expects the performance of his industry/sector coverage universe over the next 6-18 months to be attractive vs. the relevant broad market benchmark, being the S&P 500 for North America.

Neutral (N): The analyst expects the performance of his or her industry/sector coverage universe over the next 6-18 months to be in line with the relevant broad market benchmark, being the S&P 500 for North America.

Underweight (-): The analyst expects his or her industry coverage universe over the next 6-18 months to underperform vs. the relevant broad market benchmark, being the S&P 500 for North America.

General Disclosures

Fundstrat Direct is an independent research company and is not a registered investment advisor and is not acting as a broker dealer under any federal or state securities laws. Fundstrat Direct is a member of IRC Securities' Research Prime Services Platform. IRC Securities is a FINRA registered broker-dealer that is focused on supporting the independent research industry. Certain personnel of Fundstrat Direct (i.e. Research Analysts) are registered representatives of IRC Securities, a FINRA member firm registered as a broker-dealer with the Securities and Exchange Commission and certain state securities regulators. As registered representatives and independent contractors of IRC Securities, such personnel may receive commissions paid to or shared with IRC Securities for transactions placed by Fundstrat Direct clients directly with IRC Securities or with securities firms that may share commissions with IRC Securities in accordance with applicable SEC and FINRA requirements. IRC Securities does not distribute the research of Fundstrat Direct, which is available to select institutional clients that have engaged Fundstrat Direct.

As registered representatives of IRC Securities our analysts must follow IRC Securities' Written Supervisory Procedures. Notable compliance policies include (1) prohibition of insider trading or the facilitation thereof, (2) maintaining client confidentiality, (3) archival of electronic communications, and (4) appropriate use of electronic communications, amongst other compliance related policies.

This research is for the clients of Fundstrat Direct only. Additional information is available upon request. Information has been obtained from sources believed to be reliable but Fundstrat Direct does not warrant its completeness or accuracy except with respect to any disclosures relative to Fundstrat Direct and the analyst's involvement (if any) with any of the subject companies of the research. All pricing is as of the market close for the securities discussed, unless otherwise stated. Opinions and estimates constitute our judgment as of the date of this material and are subject to change without notice. Past performance is not indicative of future results. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, risk tolerance, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies. The recipient of this report must make its own independent decision regarding any securities or financial instruments mentioned herein. Except in circumstances where Fundstrat Direct expressly agrees otherwise in writing, Fundstrat Direct is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice, including within the meaning of Section 15B of the Securities Exchange Act of 1934. All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client website, FundstratDirect.com. Not all research content is redistributed to our clients or made available to third-party aggregators or the media.
