Description:

CIBR tracks a liquidity-weighted index that targets companies engaged in the cybersecurity industry.

Fund Insight:

CIBR is a specialized fund focusing on cybersecurity companies as classified by the Consumer Technology Association (CTA), which means it holds primarily software and networking companies, but also branches out from the tech sector into more diversified industries like aerospace & defense. This slightly expanded focus is the major distinction between CIBR and other similar funds, most of which have small, tech-dominated portfolios. It weights holdings by liquidity, which makes sense given the funds small-cap exposure. It also caps the weighting of the securities of the five most liquid companies at 6% each, while the securities of the remaining companies are capped at 3%. The index is rebalanced quarterly.

Description:

IHF tracks a cap-weighted index of US companies that provide healthcare services.

Fund Insight:

IHF provides well-rounded, cap-weighted exposure to US companies engaged in managed health care, facilities and insurance. This niche segment excludes pharmaceutical companies that have a heavy hand in the broader US Health Care segment. IHF diverges from our neutral benchmark exposure by including health insurance companies absent from our benchmark, and it tilts smaller. Overall, IHF's diverse holdings provide great comprehensive coverage of the health care provider space.

Description:

DRIV tracks an index that uses artificial intelligence to select global stocks involved in the development, production, or supporting technology of autonomous and electronic vehicles.

Fund Insight:

DRIV uses a proprietary natural language processing algorithm to identify companies with exposure to one of three segments: electronic vehicles (EV), electric vehicle components (EVC), and autonomous vehicle technology (AVT). The EVC segment is further split into two sub-groups: components and materials. Holdings may span the market-cap spectrum and come from across the globe, including some emerging markets. The algorithm scores eligible companies within each segment based on how frequently each firm is referenced in relation to specific keywords in public documents, such as financial news. The index is comprised of the top 15 companies in EV, top 30 in EVC (15 in each sub-group) and top 30 in AVT. The index uses a modified market-cap weighting, assigning 2% weight to each company in the bottom 20% of its segment, and capping all others at 3%. The index is reconstituted semi-annually.

Description:

ARKG is an actively managed fund that targets companies involved in the genomics industry.

Fund Insight:

ARKG reaches across multiple sectors and geographies for companies that the advisor believes will benefit from innovations in the genomics-related industry. Such companies are those that may develop, produce or enable targeted therapeutics, bioinformatics, stem cells or molecular diagnostics. The reality is almost all of its holdings are in US healthcare-related companies, with biotech naturally leading the way. This is a niche fund which employs an actively-managed strategy. Hence investors should look closely at where the fund makes its investments. The weights of the top five

Old Dominion Freight Line, Inc.	5.21	XPO, Inc.	3.61

Description:

IYT tracks a broad-based, modified market-cap-weighted index of US stocks in the transportation industry.

Fund Insight:

IYT tracks an index that invests solely in companies defined by GICS as transportation. The following sub-industries are included: air freight & logistics, airlines, airport services, highways & rail tracks, marine, marine ports & services, railroads, and trucking. Eligible securities must be included in the S&P Total Market Index and must meet certain liquidity and capitalization thresholds. All eligible securities are then selected for inclusion in the index. Securities in the underlying index are also float market cap weighted, subject to certain capping requirements. A maximum weight of 22.5% of the fund can be allocated to one company, and the aggregate weight of all issuers that individually exceed 4.5% of the index weight are capped at a maximum of 45%. Rebalancing is done on a quarterly basis. Prior to July 19, 2021, the fund tracked the Dow Jones Transportation Average Index.

Objectives of the Sector Allocation Model

We aim to create a systematic approach to sector allocation that our members can easily grasp and use to outperform the market in the long run.

Systematic Approach – Although our Sector Allocation model reflects our expectations for the future stock market, we have designed this model as a systematic approach. This will reduce the influence of personal intuition or judgment on the results. Importantly, this offers consistency, making it easier for our members to distinguish the differences between this month's allocations and those of previous months. Specifically, they can clearly discern what changes have led to our adjustments in sector weighting.

Understandability - We strive for simplicity and transparency. By establishing clear steps and guidelines, anyone involved can easily comprehend how weights are determined and why certain decisions are made. We have refrained from introducing new jargon or overly complex systems. Our objective is to make all aspects understandable, from the qualitative logic behind sector-weighting decisions to the quantitative process of producing the final sector weights.

Versatility – We aim to cover both short-term and long-term strategies, as well as both active and passive approaches, with our new model. While our macro team predominantly focuses on long-term strategies, we do not want to neglect short-term dynamics. Our new sector allocation model, akin to our acclaimed Granny Shot stock list, merges both our long-term sector perspectives with short-term market technical dynamics. In its design, we also took into account the preferences of some members who require their sector allocations to vary only within certain limitations from the standard sector weightings. The final model therefore encompasses passive index tracking and our subjective sector strategies. In the future, we hope to make the ratio between active and passive approaches adjustable, allowing members to input their desired ratios to produce personalized sector weighting recommendations.

Summary

	Universe	Description
Sector ETF Allocations (85%)	11 Sector SPDR ETFs	<i>The strategic sector ETF allocation is based on the summation of 3 sub-components: 1\ based on the current sector distribution of S&P 500 index; 2\ based on the sector rating of Fundstrat Head of Research Tom Lee and the sector technical rating of Fundstrat Head of Technical Strategy Mark Newton; and 3\ short-term sector momentum.</i>
Tactical ETF Selections (15%)	65 ETFs: 10 Style 20 Industry 35 Thematic	<i>Five ETFs, equally weighted, that we recommend for tactical holding. Their selection process is similar to our Super/Sleeping Granny Shot methodology that involves short-term technical scoring, Trend ranks, and Mark Newton's technical takes. We also utilize Morningstar's ETF ratings as part of consideration.</i>

Source: Fundstrat, Morningstar

In selecting these ETFs as part of the universe, we mainly consider: i) total Asset Under Management, ii) relative liquidity (gauged by 3-month average daily trading volume), and iii) expense ratios (favoring those from the same issuer for comparison's sake).

* if an UW sector weight is less than 2%, we will bring down the sector weight to 0% (instead of making it negative). The weight addition to each OW sector will be based on the total reduction of UW sector weight divided by 3.

Disclosures

This research is for the clients of Fundstrat Direct only. For important disclosures and rating histories regarding sectors or companies that are the subject of this report, please contact your sales representative or Fundstrat Direct at 150 East 52nd Street, New York, NY, 10022 USA.

Analyst Certification (Reg AC)

Thomas J. Lee and Mark Newton hereby certify that all of the views expressed in this report accurately reflect their personal views, which have not been influenced by considerations of the firm's business or client relationships.

Neither of these analysts, nor a member of their households is an officer, director, or advisory board member of the issuer(s) or has another significant affiliation with the issuer(s) that is/are the subject of this research report. There is a possibility that they will from time to time have long or short positions in, and buy or sell, the securities or derivatives, if any, referred to in this research.

Conflicts of Interest

This research contains the views, opinions and recommendations of Fundstrat Direct. As of the time of writing and publication of this presentation, Fundstrat Direct does not know of, or have reason to know of any material conflicts of interest at the time of the publication of this presentation. The Company has no contractual relationship, nor have we received any compensation from any of the companies listed in this research report.

Analyst Industry/Sector Views

Overweight (+): The analyst expects the performance of his industry/sector coverage universe over the next 6-18 months to be attractive vs. the relevant broad market benchmark, being the S&P 500 for North America.

Neutral (N): The analyst expects the performance of his or her industry/sector coverage universe over the next 6-18 months to be in line with the relevant broad market benchmark, being the S&P 500 for North America.

Underweight (-): The analyst expects his or her industry coverage universe over the next 6-18 months to underperform vs. the relevant broad market benchmark, being the S&P 500 for North America.

General Disclosures

Fundstrat Direct is an independent research company and is not a registered investment advisor and is not acting as a broker dealer under any federal or state securities laws. Fundstrat Direct is a member of IRC Securities' Research Prime Services Platform. IRC Securities is a FINRA registered broker-dealer that is focused on supporting the independent research industry. Certain personnel of Fundstrat Direct (i.e. Research Analysts) are registered representatives of IRC Securities, a FINRA member firm registered as a broker-dealer with the Securities and Exchange Commission and certain state securities regulators. As registered representatives and independent contractors of IRC Securities, such personnel may receive commissions paid to or shared with IRC Securities for transactions placed by Fundstrat Direct clients directly with IRC Securities or with securities firms that may share commissions with IRC Securities in accordance with applicable SEC and FINRA requirements. IRC Securities does not distribute the research of Fundstrat Direct, which is available to select institutional clients that have engaged Fundstrat Direct.

As registered representatives of IRC Securities our analysts must follow IRC Securities' Written Supervisory Procedures. Notable compliance policies include (1) prohibition of insider trading or the facilitation thereof, (2) maintaining client confidentiality, (3) archival of electronic communications, and (4) appropriate use of electronic communications, amongst other compliance related policies.

This research is for the clients of Fundstrat Direct only. Additional information is available upon request. Information has been obtained from sources believed to be reliable but Fundstrat Direct does not warrant its completeness or accuracy except with respect to any disclosures relative to Fundstrat Direct and the analyst's involvement (if any) with any of the subject companies of the research. All pricing is as of the market close for the securities discussed, unless otherwise stated. Opinions and estimates constitute our judgment as of the date of this material and are subject to change without notice. Past performance is not indicative of future results. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, risk tolerance, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies. The recipient of this report must make its own independent decision regarding any securities or financial instruments mentioned herein. Except in circumstances where Fundstrat Direct expressly agrees otherwise in writing, Fundstrat Direct is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice, including within the meaning of Section 15B of the Securities Exchange Act of 1934. All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client website, FundstratDirect.com. Not all research content is redistributed to our clients or made available to third-party aggregators or the media. Please contact your sales representative if you would like to receive any of our research publications.
