I think a lot of people still don't understand the scale of debt issuance by the hyperscalers. They're on pace to be as sizeable in the IG bond market as the big banks within a few years

Exhibit 2: Hyperscaler US IG index notional relative to other large sectors

Hyperscaler US IG index debt could go from \$288bn at YE-2025 to \$659bn by YE-2027.

Note: assuming ~\$200bn in USD hyperscaler supply for both 2026 and 2027. Hyperscalers include: AMZN, META, MSFT, GOOGL, ORCL.

LABOR SUPPLY: Prime skilled US adults age 30-48 inflecting up and surging

The number of adults in “prime leverage age” (age 30-48) is below, based on data from the US Census Bureau.

- This figure fell from 2001-2008 (is GFC not a surprise?) and as shown below, set to accelerate 2018 to 2026.
